

Improve your internal communications in a hybrid work model through omnichannel communication software.

ITESMEDIA

Facilitate communications with the ITESLIVE digital signage software

The ITESLIVE digital signage software helps organizations create, manage and share messages remotely and in real time on any device equipped with a screen (digital signage monitor, screensavers, Microsoft Teams, etc.). We believe communications should be shared easily, at the right time and with the right persons.

Bring your teams together, wherever they are

Communications are vital to keep your employees motivated, maintain a positive corporate culture and ensure your organization's effectiveness. Employee engagement can have a significantly positive impact on productivity, performance and retention. Sharing consistent messages on different channels ensures your employees will effectively assimilate your information.

Everything you need, from content creation to distribution

ITESLIVE is a user-friendly content management system that helps you share your messages through all screens and tools. The platform's multilingual content bank helps you create content such as customizable images and templates. All digital communications are centralized and managed remotely through the ITESLIVE software interface.
